

Society of Gynecologic Surgeons

INTERNATIONAL FISTULA INFORMATION CLEARINGHOUSE

Many trainees and members of SGS and AUGS have expressed interest in donating their surgical skills, material and/or money to support the work of fistula hospitals in areas where these institutions may be the only source of care for women with this devastating complication of childbirth. As a service to the community of gynecologic surgeons, SGS would like to establish a clearinghouse for information and contacts regarding opportunities for donations, training, and travel to fistula hospitals and clinics anywhere in the world.

The clearinghouse would be part of the SGS web site and contain brief descriptions, internet links and contact information for any organization that is involved in providing care for women with fistulas in underserved areas of the world. Interested SGS members and visitors to the web site would be able to access this information to facilitate connections between those who run these organizations and those looking to volunteer their time, resources and/or money.

If you would like your organization to have a page in this new web area, please email myerc2@stlo.mercy.net. SGS will contact you to request detailed information.
